Collagen Stimulation Therapy, 1.5-2 hours £250.00*

Collagen Stimulation Therapy is a cutting edge treatment that harnesses our body's natural powers of healing to achieve incredible results. The body responds to CST the same way you would react to an injury. The small amount of bleeding caused during treatment releases powerful growth factors which are part of a natural healing response, resulting in increased collagen and elastic production.

It is especially effective for addressing the visible signs of ageing as well as sun damage, scarring, slackened skin, stretch marks and dilated blood vessels. Collagen Stimulation Therapy can be done on all areas of the face and body and is suitable for all skin types.

During this painless revolutionary procedure, you skin-care professional will apply topical anaesthetic and will use a small instrument containing tiny needles to create thousands of microscopic channels in the lower levels of your skin. This causes a bleeding that stops within minutes. After treatment your practitioner will cleanse your skin and apply nourishing vitamins A and C.
